Minh Ha Pham

Jersey City, NJ | +1 (813) 327-9777 | phamminhha3006@gmail.com | linkedin.com/in/minh-ha-pham3006/

Education

University of South Florida — **Tampa, FL**

- BSc. in AI in Business Analytics and Econometrics | GPA: 3.91 — Aug 2023 — Aug 2026

Work Experience

Data Quality Analyst Intern | *Navy Federal Credit Union* — Pensacola, FL, May 2025 - Aug 2025

- Developed a **Python z-score statistical outlier detection system** for credit scores on **300+ CECL fields**, flagging additional 50-80 anomalies per review cycle.
- Integrated NLP pipeline using NLTK to process 5000+ customer calls, generating Tableau dashboards surfacing 10+ complaint themes across lending lifecycle and **cutting manual review time by 90%**.
- Engineered a Python automation pipeline to consolidate 30—40 monthly AFP Excel reports across 12+ lending portfolios into a unified SQL database, eliminating manual aggregation and enabling real-time balance-sheet monitoring for portfolio health review.

Business Analyst Intern | *CYOBot* — NYC, NY, Feb 2024 — Jan 2025

- Conducted market sizing and competitor analysis across 10+ robotics education providers, producing positioning recommendations that directly supported 5 partnership agreements with robotics centers and universities.
- Modeled product launch price driving **$11K Kickstarter raise** using regression modeling and demand curve analysis.
- Identified lack of visibility into sales pipeline health; designed Power BI dashboards tracking conversion rates, lead-to-close time, and revenue per click, enabling data-backed weekly resource allocation and boosting throughput by 65%.

Data Analyst Intern | *Kyanon Digital* — Ho Chi Minh City, Vietnam, May 2024 — Aug 2024

- Owned end-to-end marketing analytics, integrating Google Analytics, Meta Business Suite, to build a unified view of customer behavior and campaign performance.
- Segmented audiences using DBSCAN clustering on historical engagement data, uncovering behavioral cohorts that drove targeted campaigns and **boosted CTR by 35%.**
- Built XG-Boost models to identify high-performing campaigns, guiding **reallocation of $20K in marketing budget**, converting 160+ additional qualified leads through refined funnel targeting.

Projects

Course Recommendation Portal | *AWS, Snowflake, Python, SQL* — Jun 2024 — May 2026

- Built a full ETL pipeline ingesting 10K+ job postings and 200+ courses into **Snowflake via S3 staging** and SQLAlchemy.
- Designing a normalized schema with indexing and optimized joins that **reduced query latency by 45%**.
- Developed a skill-course similarity engine using sentence-transformers vectorized embeddings and cosine similarity, validated on a hand-labeled dataset of 500 mappings; served results via **AWS Lambda** for on-demand scoring.
- Orchestrated pipeline runs with **Apache Airflow** (or **AWS Glue**) and monitored data freshness via **Snowflake** scheduling.

Leadership

President | *Google Developer Student Club* — Tampa, May 2024 — May 2025

- Directed the club's **first-ever nationwide hackathon**, overseeing end-to-end event logistics, a $20K budget, and coordinating 20+ sponsor and university stakeholders to deliver a 600+ attendee event.
- Restructured club operations into dedicated verticals, founding the club's first **Professional Development** and **Research Placement** teams to formalize member growth pathways.

Skills

Languages & Databases: Python, R, SQL (MySQL, PostgreSQL, Microsoft SQL Server, Oracle), Hadoop, Spark

Cloud & Data Engineering: AWS (S3, Lambda, Glue), Snowflake, Airflow, Talend, SQLAlchemy

BI & Visualizations: Tableau, Power BI, Looker, Plotly, Advanced Excel (VBA)

ML & Analytics: XGBoost, scikit-learn, NLTK, DBSCAN, A/B Testing, Predictive Modeling
